**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Shatto, Jr. (US Patent 3,165,899).

With regards to claim 8, Shatto, Jr. discloses a method of remotely installing a clamshell device 66 around an element 11 having a diameter, the method comprising positioning a tool 20 adjacent to the element, wherein the tool carries the clamshell device (figure 7), moving the tool to position the clamshell device around the element, operating the tool to close the clamshell device around the element and securing the device in position around the diameter of the element, see column 1, lines 60-66 and column 5, lines 34-60. Applicant should note that vortex-induced vibration reduction devices and drag reduction devices, as well as devices that cover about 50% or more of the diameter of the element are capable of being installed by the method of Shatto, Jr.

For claim 9, see column 5, lines 37-42. Applicant should note that the tool of Shatto, Jr. could carry a clamshell device comprising two hinged clamshell devices.

For claims 10 and 11, see column 1, lines 51-54.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
